Thank you Linda,

In addition to this email, it would be helpful if we could document any earlier communication (verbal or written) with the state on this effort.

Hi, Kurt. Below is the email from Cheryl to MaryAnne and Michelle Scarpace at WDNR. Cheryl called Michelle and Ryan also called MaryAnne. It was not the full two-week notice that is typical practice. Pat explains the reasons below.

If you need anything else, please let me or Pat know.

Thanks.

Linda

It looks like the specific email notice of this event didn't happen the full 2 weeks prior as is our normal practice. I am confident that there was much discussion with WDNR staff about the citizen concerns and exchanging information for months about the reported problems. We would likely need to work with Cheryl to get all the communications on this. The one week formal notice was probably due to the uncertainty that we could scrape up the sampling money and personnel, labs and so on in time to actually do this evaluation this year. We felt we had a narrow window of time in spring when conditions are best to detect any problem that might exist.

Ryan:

I apologize for not copying you. This is the e-mail I sent to MaryAnne Lowndes and Michelle Scarpace.

Sincerely,

Cheryl Burdett

Subject: Groundwater sampling in Northwest Juneau County, Wisconsin

Hello MaryAnne and Michelle:

I wanted to make you aware that EPA will be conducting groundwater sampling at approximately 41 locations up-gradient and downgradient of Central Sands Dairy, LLC's land application fields and production area in Northwest Juneau county, Wisconsin. The groundwater sampling will take place from April 30, 2018 through May 4, 2018 (unless we are able to finish early). If WDNR would like to join us on any of these days (or all of the days), please contact me and we can find a location to meet or I can provide you the sampling schedule. Also, if you would like to know more about the project, please contact me and we can further discuss the details.

Sincerely,

Cheryl Burdett
